

Project Status Update October 06, 2022

The site located at 3307 North Lawndale Ave is a 20-acre lot anticipated to be used for operations at Exchange 55 and other regional Tenant operations. The property will be operated as a sustainable state-of-the-art trailer storage yard with extensive landscaping, storm water management systems that include underground storm traps, trench drains, and a bioswale for surface water drainage, with an operation plan that will result in a reduced amount of congestion and traffic. The construction will feature approximately 3,000LF of a sheet pile Earth Retention System (ERS), an 8" reinforced heavy duty concrete surface, over 8" of compacted aggregate. The trailer storage yard will be entered into the Voluntary Site Remediation Program with the Illinois Environmental Protection Agency "IEPA" to achieve a comprehensive No Further Remediation (NFR) determination. The property will be brought up to current zoning ordinances and building codes. Please e-mail comments or questions to HRPInfoMidwest@hilcoglobal.com.

Current Site Activities:

- Deep Dynamic Compaction is complete on the south storm trap. The next step is to pour the concrete slab on grade which is scheduled for next week.
- DDC is scheduled to start next week on the maintenance building.
- DDC is a ground improvement method that compacts soil to an acceptable bearing strength.
- The north storm trap panel placement is complete. The concrete collar that secures the panels and pieces together is scheduled to be poured the next week. This will be followed by the backfilling the following week. The Storm traps are part of a system that will deliver effective stormwater management to the site. This is one of two storm traps designed for the site. Stormwater detention systems manage and control the volume and discharge timing of stormwater runoff. These systems temporarily store runoff in large underground precast concrete chambers before releasing it at a controlled rate. This helps to mitigate many of the harmful effects of high volumes of stormwater runoff, such as erosion.

A Transformation Company

Community Activities Include:

- Hilco Redevelopment Partners is sponsoring the Chicago Police 10th District's Coat Distribution which will take place early November
- Hilco Redevelopment Partners is partnering with Instituto del Progreso Latino's November food drive
- Please contact our Corporate Affairs Manager by email at hrpinfomidwest@hilcoglobal.com if you are a community organization interested in partnering with us.
